SDS Modular VESA Mount Keyboard Tray

SDS warrants that the product is free of defect. This warranty covers broken welds and paint flaking off. Everything else is considered wear and tear.

Examples not covered under warranty: scratches, worn or faded paint, bent metal, holes worn to odd shapes, etc.

If you have broken welds or paint flaking off and need to have the item replaced call 231-492-5996 and explain what has happed with the tray or email sales@vesastuff.com

All warranty return will require a RMA number. You will need to call SDS to obtain this RMA.

Shipping the item back is the responsibility of the customer.

Thanks for purchasing! ☺

Note:
The drilled holes on the left and right side of the keyboard tray are for the expansion trays; Mouse Extension Tray and/or Utility Pocket and Utility Shelf. These items are for sale on Amazon and eBay. The Utility Shelf mounts under the Keyboard Tray and makes a nice shelf for paper and other items.

We also have a Stabilizer Attachment option available that will help to remove any springy movement when mounting to any type of arm. This item can be bolted to the latest version of the Keyboard Tray.

The screws provided attach the Keyboard Tray to the wall mounting bracket and monitor. They may be extra-long! They may require cutting! Please be careful when using them.

We also provide a "Complete Kit" called the Workstation, which will provide you with the Keyboard Tray, Stabilizer Attachment, Mouse Extension, Utility Pocket and the Utility Shelf, Plus a ultra-thin wall mount bracket and all mounting hardware.

Thanks for your purchase and please remember to leave feedback.
- Sincerely SDS

All Options for the SDS Modular Keyboard Tray

Hardware

Utility Pocket

Keyboard Tray

Stabilizer Attacment

Utility Shelf

Mouse Extension

Ultra Thin Wall Mount
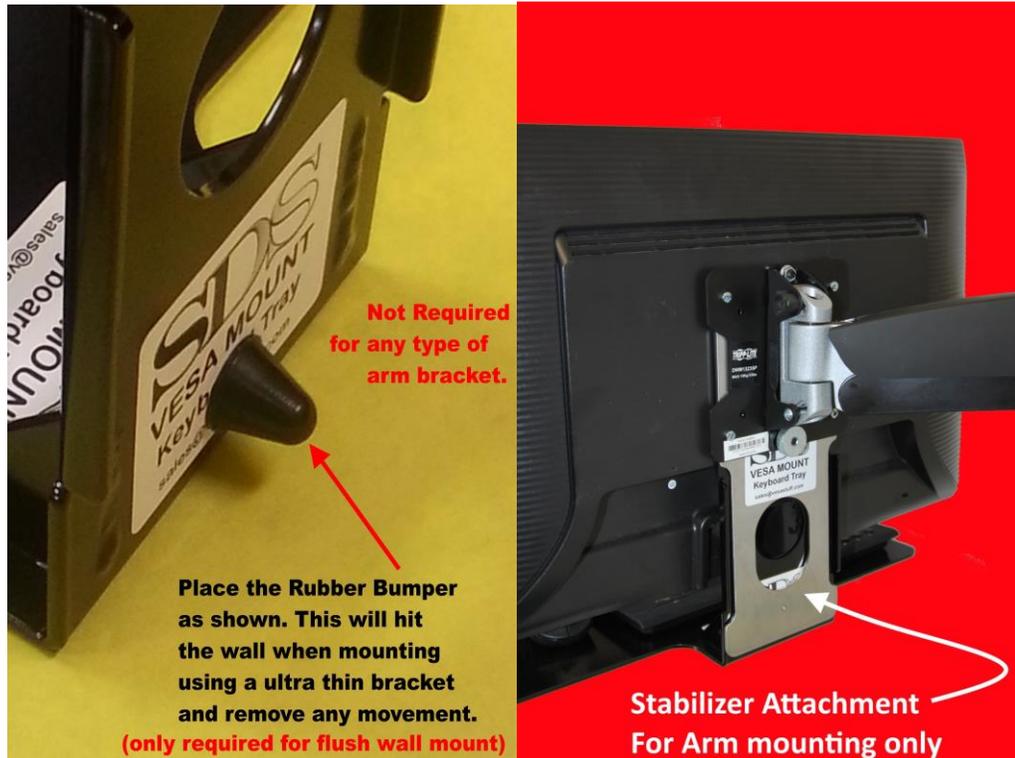

Showing the button   showing the Stabilizer Attachment

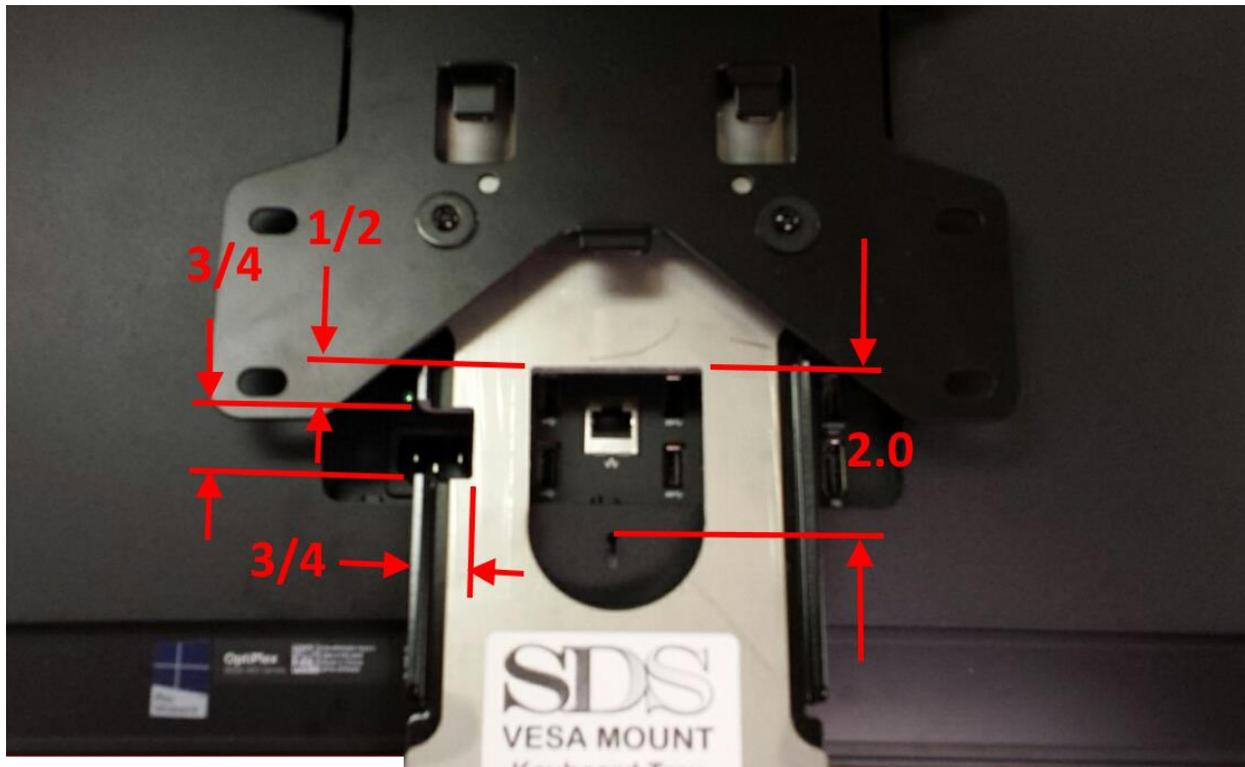

Tip: 1. Once you have installed the tray to the wall with a slim bracket you can eliminate all movement by placing rubber bumpers behind the tray and against the wall. Remember to put the rubber bumpers as close to the bottom of the tray as possible. This item is also provided.

Tip: 2. Once you have installed the keyboard tray on a wall or desktop mount arm and it's still not solid enough for how you will be using it, think about purchasing the "Stabilizer Attachment Plate". The new Stabilizer Attachment bolts to the back of the keyboard tray and really make it rigid.

Thanks from SDS, LLC

IMPORTANT NOTE: Some Dell all-in-ones are not compatible without the modifications shown in the image below –

Image shown with SDS VESA mount Keyboard Tray and Stiffener plate.

1. You have been given enough screws to mount the mouse extension and the utility cup under the utility tray if you desire use the (4) Pan Head screws and thumb nuts.
2. Mounting the mouse extension and utility cup to the keyboard tray. Place them between the Tray and the utility shelf and use the counter sink screws and thumb nuts
